EXPERIENCE

Technical Product Manager, Data Science

Public Storage, Glendale, CA

Jun 2022 - Present

Defined and executed product strategy and roadmap for key revenue generating initiatives through data-driven solutions, to elevate customer experience; drove cross-functional adoption of new technologies.

- Designed, delegated, and delivered a pricing optimization initiative integrating inventory, competitor, promotions, and demand signals to maximize move-in revenue for **1.8M+** units across **3000+** properties. Led cross-functional execution (Data Science, Engineering, Revenue Management, Field) delivering a **3.2% revenue lift** in test markets and **66% reduction in cycle time**. Scaled the solution nationwide for a **\$3.2M annual impact** within 3 months.
- Launched a new website UI and a recommendation engine that utilized customer behavior and diverse data signals. Directed collaborative efforts with Marketing, IT, Data Science, and Engineering teams to scale adoption from **10% to 80% within 4 weeks**, achieving a **1.4% reservation rate increase (\$3M CLTV impact)**.
- Advanced a first-party data initiative, partnering with the website performance team to replace third-party tags, which resulted in a **0.5 sec improvement in page load speed**, enhancing user experience and data governance.
- Drove the implementation of a Customer Data Platform (CDP), streamlining data operations and **boosting marketing efficiency by 30%** through reduced time in data collection, segmentation, and activation.
- Defined and built a **Proof of Concept (POC)** for leveraging **generative AI** (CrewAI, Langchain etc.) to explore applications in **Agentic workflows** and **Retrieval Augmented Generation (RAG)** for future product enhancements
- Built executive-level dashboards and reports communicating progress, risks and KPIs to stakeholders.

Sr. Data Science Product Engineer, ArcGIS API for Python

Esri Inc., Redlands, CA

Apr 2020 – Jun 2022

Drove cross-functional initiatives to advance spatial data science and ML capabilities within the ArcGIS ecosystem, enhancing developer experience

- Managed ArcGIS Python API lifecycle for **0.5M users/yr** leading development of impactful ML projects, defining technical requirements and managing release execution.
- Boosted developer experience by revamping documentation for spatial data analysis, mapping and visualization, and machine learning capabilities improving clarity and reducing support requests.
- Shaped API roadmap by translating user feedback into prioritized requirements for enhancing spatial processing tools, ML model integrations, and content management capabilities, guiding engineering implementation.
- Championed developer enablement for **30+ M.S. students** via ArcGIS Python API practicum, guiding real-world prototype development applying its core spatial and ML capabilities.

Business Analyst, eCommerce

Esri Inc., Redlands, CA

Jul 2017 – Apr 2020

Collaborated on implementing a global ecommerce solution to improve customer journey, and ensure compliance, replacing legacy system

- Translated user needs into detailed requirements for the ecommerce platform, improving user experience.
- Led the implementation of Adobe Analytics to ecommerce store page enabling data-driven insights into customer behavior and KPI tracking.

Esurance Inc., Rocklin, CA

Enhanced insurance quoting/policy management, driving projects from concept to IT delivery for Auto product and compliance

- Caterpillar Inc., Redlands, CA*

Led a Six Sigma effort to improve engine emissions data accuracy on Caterpillar's Technical Marketing Information website, crucial for global customers.

- Buy Stones Online, Kissimmee, FL*

Analyzed customer needs to identify improvements and develop business requirements

- ## EDUCATION

Jan 2018 - Dec 2019

Aug 2008 - May 2010

Sep 2002 - May 2007

CERTIFICATIONS

May 2020 - Aug 2020

Jul 2016 - May 2017

May 2015 - Oct 2015

SKILLS

Langchain, Google ADK, n8n, Autogen, CrewAI, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs)

Python, SQL, Google BigQuery, Jupyter Notebooks, DBT

Agile/Scrum, Project Planning, Prioritization, User Story Definition, A/B Testing

Google Cloud Platform (GCP), Flask, Streamlit

Looker, Tableau, Figma, Lucidchart, ArcGIS
